

Filter Maintenance

IMPORTANT Turn power off to hot tub at the breaker/service disconnect before removing or replacing filter.

Failing to do so, can result in the heater element being dry fired which is NOT covered under warranty.

1. Your micron sock filter should be checked weekly – lift filter from housing if water drains slow or if it holds water like a canteen, time for a clean one!
2. You can clean your filter in a washing machine with oxy bright or bleach. ***DO NOT USE LAUNDRY DETERGENT.**
3. Do not dry in dryer.
4. It is good practice to rotate at least three filters.
5. Shampoos, conditioners, lotions, etc... will dirty filter much quicker.

*Suggested: it is easier to manage filter rotation with 3-6 filters.

Additional filters can be ordered for \$20 each, 3 for \$50 or 6 for \$100 with free shipping by calling 785-825-8888 or online at www.aahsspas.com

Please feel free to contact us with further questions.
